#### SEC. 1088. SENSE OF SENATE ON EQUINE-ASSISTED THERAPY FOR WOUNDED WARRIORS AND VETERANS.

(a) FINDINGS.—The Senate makes the following findings:

(1) The bonds that exist between humans and animals can be a beneficial foundation for recovery from wounds, illness, and injury.

(2) Equine-assisted therapy may contribute beneficially to the rehabilitation of wounded warriors and veterans through physical stimulation and strengthening, improved cognitive focus, mental awareness, fitness, and self-esteem.

(3) In 2005, the 1st Cavalry Division at Fort Hood, Texas, conducted a pilot program on equine-assisted therapy for wounded warriors at the Brooke Army Medical Center, San Antonio, Texas.

(4) The Caisson Platoon Equine-Assisted Therapy Program at Fort Myer, Virginia, which is inspired and sustained by former members of the Armed Forces and volunteers, has been providing equine-assisted therapy for wounded warriors undergoing rehabilitation and treatment at the Walter Reed Army Medical Center and veterans since 2006, with the support of horses and members of the Armed Forces serving in the 1st Battalion, 3rd United States Infantry Regiment, known as the "Old Guard".

(5) The Department of Veterans Affairs has recognized the importance and benefits of equine-assisted therapy since 2007, and currently more than 30 Department of Veterans Affairs medical centers across the country participate in programs providing such therapy.

(6) In Texas alone there are currently six collaborative programs of equine-assisted therapy involving the Department of Defense and the Department of Veterans Affairs: Rock Program in Georgetown, Texas, Horseshoes of Hope in Bonham, Texas, Panther Creek Inspiration Ranch in Spring, Texas, SIRE Therapeutic Riding Centers in Houston, Texas, Spirithorse Therapeutic Riding Center in Corinth, Texas, and Stajduhar Stables in Colleyville, Texas.

(b) SENSE OF SENATE.—It is the sense of the Senate—

(1) to express gratitude for the work of all the members of the Armed Forces, veterans, and volunteers who devote time and effort under equine-assisted therapy programs to assist wounded warriors and veterans in recovering from injuries incurred in service to their country;

(2) to urge the Secretary of Defense to develop a plan for increasing access to equine-assisted therapy for wounded warriors and veterans outside the National Capital Region for whom such therapy could be beneficial in order to assist such wounded warriors and veterans in physical, mental, emotional and cognitive healing, including through collaboration between and among organizations of the Department of Defense for health, quality of life, and wounded warrior support, the Department of Veterans Affairs, and non-governmental organizations that have evaluated the effects of equine-assisted therapies in improving health and quality of life of wounded warriors and veterans; and

**SEC. 1080. REPORT ON RELOCATION OF GOVERNMENT STATIONS FROM THE 1755-1780 MHZ BAND.**

(a) IN GENERAL.—Not later than June 30, 2012, the Secretary of Defense shall, in consultation with the National Telecommunications and Information Administration, submit to the appropriate committees of Congress a report on the relocation of all Government stations currently in the 1755-1780 MHz band from that band to other bands in which Government stations operate with primary status.

(b) ELEMENTS.—The report required by subsection (a) shall include the following:

(1) An identification of the bands of electromagnetic spectrum that currently contain Government stations capable of sharing frequencies with Government stations currently in the 1755-1780 MHz band.

(2) An identification of the bands, whether on a national or smaller geographic basis, that currently possess unoccupied or underutilized frequencies on which relocated Government stations could operate with at least the same level of interference protection with which they currently operate.

(3) An identification of the bands currently containing Government stations that could utilize more spectrally efficient technologies to accommodate the relocation of Government stations from the 1755-1780 MHz band.

(4) An estimate of the costs of relocating Government stations from the 1755-1780 MHz band to bands identified under paragraphs (1) through (3) on an expedited basis.

(5) An assessment of the minimum amount of time required to so relocate such stations on an expedited basis.

(6) An assessment of the feasibility and advisability of providing the services currently provided to Federal agencies in the 1755-1780 MHz band through commercial services or other Government stations in lieu of the relocation of Government stations currently in the 1755-1780 MHz band for that purpose.

(7) An assessment, based upon the analysis required for purposes of paragraphs (1), (2), and (3), whether Government stations relocated from the 1755-1780 MHz band would operate with at least the same level of interference protection with which they currently operate, and an identification and assessment of the operational risk associated with the relocation from the 1755-1780 MHz band of each Government station currently in that band.

(c) FORM.—The report required by subsection (a) shall be submitted in unclassified form, but may include a classified annex.

(d) COSTS.—The expenses associated with conducting the study required for the report required by subsection (a) shall be considered relocation costs in accordance with section 113(g)(3) of the National Telecommunications and Information Administration Act (47 U.S.C. 923(g)(3)), and eligible Federal entities that incur expenses associated with such study may seek reimbursement for such expenses pursuant to section 118 of such Act (47 U.S.C. 928).

(1) the Committee on Armed Services, the Committee on Commerce, Science, and Transportation, and the Select Committee on Intelligence of the Senate; and

(2) the Committee on Armed Services, the Committee on Energy and Commerce, and the Permanent Select Committee on Intelligence of the House of Representatives.

**SA 1421.** Mr. KYL submitted an amendment intended to be proposed by him to the bill S. 1867, to authorize appropriations for fiscal year 2012 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle H of title X, add the following:

**SEC. 1088. SENSE OF CONGRESS ON PROTECTION OF CRITICAL COMPONENTS OF THE UNITED STATES ELECTRIC POWER GRID FROM ELECTROMAGNETIC PULSE EVENTS.**

(a) FINDINGS.—Congress makes the following findings:

(1) The United States Government has a primary responsibility to provide for the common defense and general welfare of the United States.

(2) The society, economy, and national security apparatus of the United States are critically dependent upon the availability of electricity.

(3) A continuing supply of electricity is necessary for sustaining water supplies, production and distribution of food, fuel, communications, financial services, and other very significant elements of the United States economy.

(4) Contemporary United States society is not structured, nor does it have the means, to provide for the needs of nearly 300,000,000 Americans without electricity.

(5) Because the existing United States electrical power grid operates at or near its

physical capacity, relatively modest damage to the grid could cause functional collapse.

(6) Electromagnetic pulse (EMP) is a threat to the overall electrical power system of the United States.

(7) A major electromagnetic pulse event could couple ultimately unmanageable currents and voltages into an electric power grid routinely operated with little margin and cause the collapse of large portions of the United States electric power grid for a substantial length of time.

(8) The current strategy for recovery from an electromagnetic pulse event leaves the United States ill-prepared to respond effectively, resulting in potential damage to vast numbers of electric components over an unprecedented geographic scale.

(9) A collapse of large portions of the United States electric power grid will result in significant periods of power-outage, and restoration from collapse or loss of significant portions of the system may be exceedingly difficult.

(10) If the United States electric power grid is lost for any substantial period of time, the consequences are potentially catastrophic to civilian society.

(11) Electromagnetic pulse occurs both naturally, such as geomagnetic storms, and via manmade causes, such as the high-altitude detonation of a nuclear device.

(12) The International Atomic Energy Agency released a report in November 2011 that cites concerns over nuclear weapons-related developments in Iran.

(13) A perceived vulnerability of the United States electric power grid to electromagnetic pulse could invite a potential enemy to attempt an electromagnetic pulse attack.

(14) The Department of Defense relies upon civilian sources outside Department installations for ninety-nine percent of electricity needs.

(15) Eighty-five percent of the electricity supply for the Department is outside of Department control.

(16) There is deep concern regarding the negative impacts on the United States electric power infrastructure and Department interests from an electromagnetic pulse event unless practical steps are taken to provide protection for critical elements of the United States electric power grid.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) it is in the national interest of the United States to immediately address vulnerabilities to its electric power grid from natural and manmade electromagnetic pulse events, particularly by engaging in efforts to ensure that the United States electric power grid, especially portions of the grid critical to national security, are protected from natural or manmade electromagnetic pulse; and

(2) the Department of Defense should ascertain which of its critical sources of electricity are not protected against interruptions from natural or manmade electromagnetic pulse and develop and implement a plan to remedy any such vulnerabilities.

**SA 1422.** Mr. LAUTENBERG (for himself and Mr. KIRK) submitted an amendment intended to be proposed by him to the bill S. 1867, to authorize appropriations for fiscal year 2012 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:
